Henry Peeples

Software Developer

I am a current senior at the University of North Texas pursuing a degree in computer science. My primary goal after college is to get a position as a Golang developer and branch out on my skills. A list of projects can be found on my GitHub and also on my personal website.

COLLABORATIVE PROJECTS

Optimal Accessibility

A web application that calculates the accessibility rating of advertisment posters. This was a collaborative project with one other member of my class.

The website is not currently deployed.

CodeStreamStudios online code editor

This was a group project in collaboration with CodeStreamStudios. We upgraded their online code editor and integrated grading functionality.
